PROFESSIONAL SUMMARY

Enterprise architect and Field CTO with 35+ years turning complex business requirements into production systems. Built the integration middleware and adapter platform that connected SAP, Oracle, Salesforce, and PeopleSoft into global enterprise deployments at iWay/IBI - holding a co-inventor patent on enterprise application integration frameworks. Designed the Unified Commerce NorthStar architecture at PAR Technology using enterprise architecture methodologies; leads Fractional CTO and AI strategy engagements at BrainTrailz and Beyond Limited Thinking building agent-orchestration and AI-native platforms. Expert in C-level executive advisory, cloud-native SaaS strategy, data architecture, API ecosystem design, and enterprise modernization - with the track record to help organizations realize the full value of process intelligence and agentic AI.

CORE COMPETENCIES

Field CTO & Executive Advisory | Enterprise Architecture & EA Methodologies | Agentic AI & Process Automation | API Ecosystems & Integration Architecture | Cloud-Native SaaS Strategy | Enterprise Modernization | Data Architecture & Governance | Engineering Leadership (up to 82)

WORK EXPERIENCE

iWay Software / Information Builders, Inc.

Sep 2001 - Nov 2015

Chief Software Architect | VP, Development & Product Operations

Enterprise integration, data, and analytics software · New York, NY

- Owned architecture and product strategy across the iWay integration portfolio - transformed the platform from narrow data integration into a full **SOA/ESB and enterprise adapter platform** connecting SAP, Oracle, Salesforce, PeopleSoft, and 300+ enterprise systems.
- Architected and implemented the flagship **iWay Service Manager runtime** - the core enterprise integration engine used in production at global enterprises; defined the company's web services and adapter strategy.
- Co-inventor, U.S. Patent 7,421,709 - Framework for Adapter Used in **Enterprise Application Integration** (issued 2008).
- Personally defined concept, ideation, and MVP direction for iWay Integration Tools (IIT); helped define architecture for iWay Enable, extending the platform with CEP, BAM, event capture, rules, and visualization.
- Led globally distributed **engineering organizations of up to 82 developers** across the US and international sites; contributed to adjacent governance, monitoring, and lifecycle products including iWay Sentinel.

BrainTrailz / CodeMarc Network

Jan 2021 - Present

Founder · Fractional CTO · Director of Agent Orchestration

AI advisory, product incubation, and mission-driven software practice · Delray Beach, FL

- Translate ambiguous business goals into roadmaps, system designs, prototypes, operating cadence, and technology decisions spanning **enterprise architecture**, observability, governance, and vendor strategy - Fractional CTO advisory across hospitality, logistics, real estate, and enterprise software.
- Designed **agent-orchestration and workflow systems** combining classic integration patterns, AI skills, human review loops, and operator consoles to compress research, automation, and delivery cycles.
- Created ADAM - a local-first routine engine and operator console for data, automation, messaging, review, and multichannel delivery; architecture reflects real-world **agentic AI** deployment constraints.
- Lead fractional CTO and **AI advisory engagements** presenting technology strategy and build/buy/integrate decisions directly to C-suite and board stakeholders.

PAR Technology Corporation

Mar 2022 - Dec 2022

Chief of Staff, Office of the CTO

Enterprise software, systems, and services for restaurant and retail industries · Remote, NY

- Designed the 2025 **Unified Commerce NorthStar architecture** - a multi-year enterprise architecture framing build/buy/integrate decisions across quarterly and annual horizons using **EA methodologies**.
- Acted as de facto CTO on new product initiatives: owned architecture decisions, non-functional requirements, **vendor evaluations**, and proof-of-concept delivery for **cloud-native SaaS** products.
- Established governance guardrails across architecture, standards, and tooling selection while mentoring architects and engineering leads on enterprise modernization practices.

Intelligent Audit

Feb 2023 - Apr 2024

Chief of Staff, Office of the CTO

Supply chain, freight audit, payments analytics, and machine learning platform · Remote, NJ

- Served as primary bridge between the CTO and commercial, client-facing, and operational teams - translating technical strategy into business decisions and vice versa (**C-level executive advisory** pattern).
- Designed and implemented enterprise observability practice in Datadog; authored the 10 Critical Processes monitoring roadmap supporting **data architecture** and platform reliability.
- Led AWS MAP Access planning and funding to support **hybrid-cloud migration** and longer-term scale - direct enterprise modernization impact.
- Led DevOps modernization to GitHub Enterprise, Actions, and container packaging, improving engineering productivity and release reliability.

Beyond Limited Thinking, LLC

May 2025 - Present

CTO & Co-Founder

AI-native, payments-neutral hospitality platform · Remote

- Own architecture, engineering workflow, security posture, and **build/buy/integrate decisions** from MVP through launch readiness - full-stack **enterprise architecture** ownership.
- Defined end-to-end technology strategy for BLT Core including restaurant-facing POS, local gateway runtime, schema/**data layer**, deployment control plane, and **API ecosystem**.
- Built modular, **cloud-native** product architecture for hospitality workflows designed for rapid iteration and partner-led deployment without processor lock-in.
- Established **AI-native development approach** accelerating prototyping, testing, and release preparation while preserving production discipline across a multi-repo workspace.

BuildingLink.com, LLC

Sep 2016 - Dec 2021

Consultant / Developer / Architect

Enterprise SaaS platform for luxury residential property management · Remote, NY

- Envisioned and built the DataLink analytics platform on Power BI and Qlik Sense - **data architecture** delivering embedded BI and self-service insight against a decade of operational data.
- Developed the modernization roadmap spanning Kubernetes, Kafka, microservices, and cloud adoption - **enterprise modernization** moving the organization beyond monolithic architecture.
- Designed tenant-aware analytics using OAuth2, API-based authorization, role-specific models, and row-level security; built voice and conversational access patterns including Alexa integration.

Smash Data, Inc.

May 2016 - May 2019

Co-Founder / Chief Technology Officer

Real-time analytics startup for the restaurant industry · New York, NY

- Identified market gap, defined product, and architected a cloud-based **integration platform** for restaurant POS analytics; built the Smashboard MVP delivering near-real-time P&L-grade operational visibility.

Earlier Career

1987 - 2001

Information Builders · Crossborder Exchange · IBM

New York, NY / Endicott, NY

- At Information Builders, architected the IBI XML Connector Toolkit, EDA/Message Server, and protocol-independent communications APIs across enterprise platforms. At Crossborder Exchange, designed a prototype SWIFT-based cross-border settlement core using Java, Oracle, IBM MQSeries, MQSI, and XML integration. At IBM Glendale Labs, led major parts of the OS/2 and OS/400 REXX environment.

KEY PROJECTS & INTELLECTUAL PROPERTY

U.S. Patent 7,421,709 - Enterprise Application Integration Adapter Framework

Co-Inventor

Co-invented the framework for adapters used in enterprise application integration - the architectural foundation underlying the iWay integration platform and its connectivity to SAP, Oracle, Salesforce, PeopleSoft, and 300+ enterprise systems.

Enterprise Integration · Adapter Architecture · SOA/ESB · iWay Software / Information Builders

ADAM - Agent-Orchestration Engine & Operator Console

BrainTrailz / CodeMarc

Local-first routine engine combining classic integration patterns with agentic AI skills, human-in-the-loop review, and multichannel delivery. Designed for real-world enterprise deployment constraints: auditability, reliability, and operator control.

Agentic AI · LLM Orchestration · Workflow Automation · Human-in-the-Loop · Node.js

PAR Technology - Unified Commerce NorthStar Architecture

Enterprise Architecture

Multi-year enterprise architecture defining build/buy/integrate decisions across quarterly and annual horizons for PAR Technology's cloud-native SaaS product portfolio serving the restaurant and retail industries. Used EA capability mapping methodologies to frame the 2025 roadmap.

Enterprise Architecture · EA Methodologies · Cloud-Native SaaS · Build/Buy/Integrate

BLT Core - AI-Native Hospitality Platform

Beyond Limited Thinking

End-to-end technology strategy and architecture for a payments-neutral hospitality platform: restaurant-facing POS, local gateway runtime, schema/data layer, deployment control plane, and shared tooling - designed for rapid iteration and partner-led deployment.

Cloud-Native Architecture · AI-Native · Data Layer Design · API Ecosystem · Multi-repo

EDUCATION

Bachelor of Science, Computer Science · Syracuse University — Syracuse, NY

PATENTS & THOUGHT LEADERSHIP

Co-Inventor · U.S. Patent 7,421,709 - Framework for Adapter Used in Enterprise Application Integration — Issued 2008

Writer & Speaker on AI Strategy, Agent Orchestration, Engineering Leadership - BrainTrailz & CodeMarc

SKILLS

AI & Agentic: Agentic AI Architecture, LLM Orchestration, RAG Pipelines, AI Strategy, Human-in-the-Loop Design

Architecture: Enterprise Architecture, SOA/ESB, Microservices, Event-Driven Design, API Ecosystem Design

Integration: Enterprise Application Integration, Adapter Frameworks, SAP Connectivity, Salesforce Integration, MQ/Messaging

Cloud & DevOps: AWS, Azure, Kubernetes, GitHub Actions, CI/CD, Datadog Observability

Languages: Node.js, Python, JavaScript, SQL, Java (enterprise context)

Leadership: Engineering Org Leadership (up to 82), Fractional CTO Advisory, EA Governance, Board/C-Suite Communication
